

# Case Study Part 1

## Creating a radar chart worksheet for trends and disruptions:

We will shortly send you in your team in your BOS. You will work there on the assignment. Take a moment to get to know your fellow team members and give your team a name (you can also choose a slogan as well as a logo if you like). It helps also if you set a timekeeper ;)

In your Break-out room you will find the case study part 1 (PDF document) as well as a radar chart PPT. Your tasks:

- Please **individually** read through the case study part 1. This should take about *25-30 min* max.
- Use the **radar chart** to map out the trends and disruptions as instructed. Please do this **individually first** (so you should have 4 different radar charts). Timebox: *10 min*
- **Share and discuss your radar charts** in your team and compare commonalities and differences. Please **create 1 unique radar chart** for the team (this means wherever the charts differ you need to agree on something all team members are comfortable with). Timebox: *30 min*
- You now should have 1 chart for your team. This you will **present back in the plenary**. Please agree on **which person** of your team will present. That person should particularly highlight which areas were an immediate agreement and which might have differed (and how you came to an agreement when you differed). Timebox: *5 min*
